# PFAS Product Declaration Statement

Per- and polyfluoroalkyl substances (PFAS) comprise a broad class of fluorinated substances used in numerous industrial and commercial applications. The definition and regulatory treatment of PFAS vary by jurisdiction and regulatory program. PFAS are subject to evolving federal, state, and international reporting, disclosure, labeling, and restriction requirements.

SV Microwave, Inc. designs and manufactures high-performance RF and microwave connectors, cable assemblies, and components for defense, aerospace, telecommunications, and other critical applications. Certain SV Microwave products may contain intentionally added PFAS to provide required electrical, dielectric, thermal, chemical, or mechanical performance. These materials may include fluoropolymers such as polytetrafluoroethylene (PTFE), fluorinated ethylene propylene (FEP), perfluoroalkoxy alkane (PFA), and other fluorinated materials.

The attached SV Microwave Parts List identifies products currently determined to contain PFAS based on information reasonably available to SV Microwave, including material specifications, supplier information, and product records. The list identifies the applicable SV Microwave part number and identified PFAS substance, including the Chemical Abstracts Service (CAS) Registry Number where available. The information is subject to change as additional supply-chain or regulatory information becomes available.

SV Microwave monitors applicable PFAS regulatory requirements, including requirements administered by the U.S. Environmental Protection Agency (EPA) under the Toxic Substances Control Act (TSCA), as well as applicable state and international requirements. Because PFAS definitions, exemptions, reporting requirements, and restrictions vary by jurisdiction, inclusion of a substance or product on the attached list does not, by itself, indicate that the product is reportable, restricted, or prohibited under any particular PFAS regulation.

The information provided is based on information reasonably available to SV Microwave, including material specifications and supplier information. PFAS content and regulatory status may vary based on product configuration, material formulation, supplier information, and applicable regulatory requirements.
